PROJECT

CHAT APPLICATION
(Aug 2023 - Dec 2023)

The chat application is built using react js deployed using chat engine api , and hosted on netlify. The main aspect is where one user can can send text ,images from one end and the other receives the same from their end. Also user can create a chat group ,add any number of people to their wish and share the text, images apparently the other members of the group receives the same in the chat room.
